

## FAQ

### ***What is Impact colorant?***

Impact is a new hybrid coating developed by Colorbiotics<sup>®</sup>. It combines revolutionary technology and process optimization to provide a high quality colorant at a lower investment.

### ***Do the colors ever wash off the mulch?***

No. Once the colors dry, they are on the mulch permanently. You will not experience any color wash-off or leaching.

### ***Are the colorants safe for my plants and animals?***

Yes! The raw materials used to make Colorbiotics colorants are made from naturally occurring colors found in the earth's surface. These colorants, as well as the other ingredients in Colorbiotics, are specially formulated to be nontoxic to plants and animals.

### ***How much mulch should I apply?***

As a general rule of thumb, you should apply mulch at a depth of two to four inches. Use less mulch for heavy, clay soils and more for lighter, sandy soils.

### ***How long does the mulch maintain its color?***

Color-enhanced mulch will typically maintain its color for more than one season, compared to other mulches, which turn gray or white after just a few weeks.

### ***How does Starburst compare to Mulch Magic<sup>®</sup> or Select<sup>®</sup>?***

Utilizing modular coating technology enhances the visual impact of Starburst to give it a color strength that is significantly more intense than Mulch Magic and Select.

### ***How important is the wood source?***

The raw material source is a key factor of end product quality for all colored mulch products. Generally speaking, dark materials tend to yield dark, rich shades while light materials tend to yield brighter shades.
